## TTSH Doctor Clinches Awards

Dear colleagues,

It's a great pleasure to announce that our Urologist **Dr Gerald Tan** has been awarded the prestigious **John Steyn Travelling Fellowship in Urology Award** by the **Royal College of Surgeons of Edinburgh**. The award is in recognition of his training in robotic urology and andrology at the Department of Urology of Weill Medical College, Cornell University. It is the first time since its inception 10 years ago that this accolade has been awarded to an urologist trained outside the United Kingdom.

Gerald also bagged the **Best Research Abstract (Basic Science Category) Award** at the recent **Sexual Medicine Society of North America Fall Meeting in Toronto**. He clinched this top award in the Basic Science Category for his presentation on improving potency outcomes during the surgical technique of nerve-sparing radical prostatectomy.

Gerald's achievements through research in prostate cancer and training in robotics and infertility are excellent developments for our research efforts.

Congratulations Gerald. You have done TTSH proud!
